Work Experience

Web Develop

Private Customer

February 2023 to Current

Making my client's portfolio website using Django, Docker, and Frontend knowledges. It does not have so many functions, so I am focusing on aesthetic features more.

Language Tutor

Instytut Lingwistyki

June 2022 to February 2023

Discussing topics with my boss about what to teach, and then make descriptions and teach Japanese to my students online. Even though it is unrelated work experience to an engineer field, I fully enjoy it and like to help someone.

Peersonal Projects

My Portfolio

February 2023 to March 2023

Built my portfolio using Django, bought domain name and published on my own.

www.seitafujiwara.com

Workout Records

July 2022 to August 2023

Each user has his own account and can save his work out records. Its record is visible as a graph by using chart.js library.

Statistic Python Library

March 2023 to Present

Building my own python library for testing statistics based on statistics knowledge.
